

RamFlash Adhesive

Synthetic Polymer-Based General Purpose Bonding Adhesive

APPLICATION	Flashing Membrane Adhesive
INSTALLATION	Single Component
TECHNOLOGY	Synthetic Polymer-Based

RamFlash Adhesive is a high-strength, synthetic polymer-based adhesive that allows for quick bonding of Flashings to acceptable substrates (i.e. wood, metal, concrete).

RamFlash Adhesive is fast drying, allowing for a quick return to service. It is highly resistant to heat and aging and can be applied with a brush or roller.

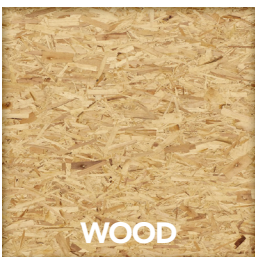

FEATURES

- Single Component
- Economical
- High Strength
- Fast Drying
- Highly Resistant to Heat & Aging
- Can be applied with a Brush or Roller

COLOR

- Amber

APPLICABLE SUBSTRATES	 CONCRETE	COVERAGE	2.5 dry mils
	 METAL		60 sq ft/gal
	 WOOD		
		PACKAGING	 5 Gal Pail
		APPLICATION	 Brush  Roller
