

ram 309

PRODUCT DESCRIPTION

ram 309 is a reinforced SBS Kraton Modified Bitumen membrane with an embedded granule surface. It is designed for hot bitumen applications. It is not an appropriate product for torch flame application.

ram 309 is durable and resilient with excellent tensile properties.

USES

With **ram-Tough BUR** and **ram-Tough Waterproofing Systems**, for all weather-exposed flashings, including wall flashings. Also used as a cap sheet with asphalt built-up roofs. Material has excellent adaptability to extreme temperature ranges, excellent UV resistance, good chemical resistance and is 100% compatible with **ram-Tough** modified bitumens.

Packaging

Roll Size	33 feet x 39 inches (one square)
Weight	90 pounds per roll

Performance

Thickness	2.3 mm		
Surfacing	ceramic granules		
Reinforcement	fiberglass mat		
Polymer Modifier	SBS		
Breaking Strength	ASTM-D-412	MD	82 pounds per inch
		XD	67 pounds per inch
Elongation	ASTM-D-412	4%	
Cold Bend	CGSB-37-GP56M	-20°F
