

# ram 32

## PRODUCT DESCRIPTION

**ram 32** is a heavy weight fiberglass mat impregnated with asphalt and fully coated on each side with a weathering grade of asphalt.

## USES

**ram 32** is used as an economical base ply and interply sheet in built-up roofing systems and as a ply sheet in cold process built-up systems. The sheet is approved by Underwriter Laboratories as a G-2 BUR sheet and exceeds ASTM D-4601-86 Type II and Federal Spec SS-R-620 B, Type II requirements.

## CAUTION

In cold process applications the sheet must be rolled out and pre-cut to 34 foot lengths and allowed to "relax" in a warm environment prior to application. Cold process application below 40°F is not recommended.

## Packaging

Roll Size	36 inches x 103 lin ft (309 square feet)
Approximate Weight Per Roll	75 lbs
