

## KLB-100 Case History

### **ram-Tough Elastomeric BUR Systems Frenchman's Reef beach Resort St. Thomas U.S. Virgin Islands**

The elements confronting roofing do not understand compromise. Prior to installation of a Barrett roof, this 12 year old luxury resort hotel had undergone an original and two complete reroofing installations. Each system was generically different and each failed.

Environmental conditions included blistering heat, tropical rain induced thermal shock, unusually high ultraviolet exposure, tropical storms and hurricanes. The lack of qualified local contractors and heavy maintenance foot traffic were just some of many considerations confronting the owners.

Barrett Company worked with the owner in designing an uncompromising, Elastomeric BUR System. Since installation in 1987 the system continues to perform, having weathered numerous storms and hurricanes.
