

RamProof GC

Single Component Fluid Applied
Elastomeric Rubberized Asphalt
Waterproofing Membrane

from The Barrett Company, LLC

WHY CHOOSE US

For over 10 decades, the Barrett Company has provided hands-on experience, professionally engineered products, & systems in the high-performance roofing & waterproofing applications.

Satisfaction

Loyal & service-oriented

Team support

Labor & material warranties available

Revolutionizing waterproofing with its asphaltic-rubber formulation, **RamProof GC** offers complete protection against hydrostatic pressure, cracks, and surface movement. Its rapid installation and LEED-certified status make it a go-to solution for a wide range of applications, from green concrete to plaza decks.

RamProof GC offers several unique benefits, including:

- **Cold Application:** Unlike traditional hot liquid application methods, cold liquid application reduces the chance of moisture evaporation and expansion of trapped air in concrete, ensuring a continuous membrane for superior waterproofing integrity
- **Seamless Membrane:** RamProof GC forms a single set, fully adhered, monolithic, and seamless membrane that resists hydrostatic pressure, bridges cracks, and moves with surface expansion and contraction.

APPLICATIONS

- Green Concrete
- Warehouses
- Masonry
- Storage Areas
- Basements
- Tunnels
- Damp Proofing
- Foundation Walls
- Plaza Decks
- Restrooms
- Parking Decks
- Planters
- Bridges

RamProof GC (Green Concrete) is comprised of an industry changing asphaltic-rubber formulation that combines the elastic properties of modified rubber with the weatherproofing and waterproofing characteristics of emulsified asphalt. The resulting asphaltic-rubber membrane provides a complete, high-performance waterproofing membrane that is VOC-free, environmentally friendly, rapidly installed, and delivers a complete solution for the entire scope of waterproofing.

**BETWEEN THE WORLD
AND THE WEATHER SINCE 1928**

Feature & Benefits

Environmentally Friendly: RamProof GC is VOC-free and environmentally friendly, making it the ideal choice for eco-conscious businesses.

Rapid Installation: Say goodbye to lengthy installation processes. RamProof GC can be installed quickly and efficiently, saving you time and money.

Complete Solution: From commercial roofing contractors to building owners and architects, RamProof GC offers a complete solution for all your waterproofing needs.

FEATURES

- Single Component
- Economical
- +1000% Elongation
- Self-Healing
- Tenacious Adhesion
- Labor-Saving; Quick Return-to-Service
- No VOCs
- Expands & Contracts
- Easy to Use
- Apply Immediately After Forms Removal
- Labor-Saving
- Eco-Friendly
- LEED-Certified

COLOR

- Black
